

Your flu jab

Your flu jab

Flu is an illness. It spreads in winter.

Flu is worse than a cold. You can feel very ill for days.

Some people get so ill with flu that they need to go to hospital.

People with a learning disability can get very ill with flu.

The flu jab helps to protect you.

The flu jab is free for people with a learning disability.

You need a flu jab every year. Last year's jab will not protect you this winter.

Have you had your flu jab this winter?

☐ Yes ☐ No ☐ Not sure

To get your flu jab, phone your doctor's surgery. You can also ask at a chemist.

The jab is a small injection in the top of your arm. It is quick.

The flu jab cannot give you flu.

Your arm may be sore for a day or two. You may feel a bit achy. This is normal.

Tell the nurse if you have ever had a bad allergy to a vaccine.

If you have a high temperature on the day, you may need to wait until you are better.

Do you know how to get your flu jab?

☐

Yes

☐

Not sure

Ask someone you trust to help you phone your doctor's surgery.

It is best to have your flu jab in the autumn, before winter.
